Period for Reply

A SHORTENED STATUTORY PERIOD FOR REPLY IS SET TO EXPIRE 3 MONTH(S) FROM THE MAILING DATE OF THIS COMMUNICATION.

- Extensions of time may be available under the provisions of 37 CFR 1.136(a). In no event, however, may a reply be timely filed after SIX (6) MONTHS from the mailing date of this communication.
- If the period for reply specified above is less than thirty (30) days, a reply within the statutory minimum of thirty (30) days will be considered timely.
- If NO period for reply is specified above, the maximum statutory period will apply and will expire SIX (6) MONTHS from the mailing date of this communication.
- Failure to reply within the set or extended period for reply will, by statute, cause the application to become ABANDONED (35 U.S.C. § 133). Any reply received by the Office later than three months after the mailing date of this communication, even if timely filed, may reduce any earned patent term adjustment. See 37 CFR 1.704(b).

DETAILED ACTION

1. Responsive to Preliminary Amendment filed on February 21, 2002.

Claim 1 has been amended. Claims 1-5 are presented for examination.

Claim Rejections - 35 USC § 102

2. The following is a quotation of the appropriate paragraphs of 35 U.S.C. 102 that form the basis for the rejections under this section made in this Office action:

A person shall be entitled to a patent unless –

(e) the invention was described in (1) an application for patent, published under section 122(b), by another filed in the United States before the invention by the applicant for patent or (2) a patent granted on an application for patent by another filed in the United States before the invention by the applicant for patent, except that an international application filed under the treaty defined in section 351(a) shall have the effects for purposes of this subsection of an application filed in the United States only if the international application designated the United States and was published under Article 21(2) of such treaty in the English language.

3. Claims 1 and 3-5 are rejected under 35 U.S.C. 102(e) as being anticipated by Woram (U.S. Patent No. 6,728,262).

4. As per claim 1, Woram teaches a method of using a supervision client based on an OPC protocol to supervise and control a transport network including a data server based on an SNMP protocol (**column 4, lines 26-54**), which method comprises

connecting said supervision client to a gateway including means for providing a connection between said data server and said supervision client using a description of the data of said data server from a management information base (**column 4 lines 26-54**).

Art Unit: 2154

5. As per claim 3, Woram teaches said data server is a server of a telecommunication transport network (**column 2, lines 21-34 and column 8, lines 51**).
6. As per claim 4, Woram teaches said data server is a server of a data transport network (**column 4, lines 39-54**).
7. As per claim 5, Woram teaches a data server based on an SNMP protocol including a gateway adapted to provide a connection with a supervision client based on an OPC protocol using a description of the data of said server from a management information base (**column 4, lines 36-54**).

Claim Rejections - 35 USC § 103

8. The following is a quotation of 35 U.S.C. 103(a) which forms the basis for all obviousness rejections set forth in this Office action:

(a) A patent may not be obtained though the invention is not identically disclosed or described as set forth in section 102 of this title, if the differences between the subject matter sought to be patented and the prior art are such that the subject matter as a whole would have been obvious at the time the invention was made to a person having ordinary skill in the art to which said subject matter pertains. Patentability shall not be negated by the manner in which the invention was made.

9. Claim 2 is rejected under 35 U.S.C. 103(a) as being unpatentable over Woran (U.S. Patent No. 6,728,262) in view of "Official Notice".
10. As per claim 2, Woram teaches the use of the internet (**column 11, lines 18-27**) but fails to explicitly teach the use of XML language.

Art Unit: 2154

11. However, "Official Notice" is taken that both the concept and advantages of using XML language is well known and expected in the art. It would have been obvious to one of the ordinary skill in the art to use XML language because it would offer greater flexibility in organizing and presenting information than is possible with the other markup languages; such as HTML.

Conclusion

The prior art made of record and not relied upon is considered pertinent to applicant's disclosure.
